Interest income

The table below shows key drivers of interest income, or revenue, *i.e.* business volumes and interest rates.

	Nine months ending 30	Nine months ending 30 September		
	2015	2014	% change	
	(in millions of El			
Total value of loans issued	791.1	592.8	+33%	
Average net loan portfolio	270.2	205.3	+32%

Interest income, or revenue, for the Period was EUR 229.3 million, a 39% increase compared with EUR 164.5 million for the nine months ending 30 September 2014. This reflects the 32% increase in the average balance of the net loan portfolio and 8 percentage point increase in average interest rate. The value of loans issued increased across the majority of our markets, and higher growth continues to be seen in Poland, Georgia and Spain, where interest rates are also typically higher.

Interest expense

Interest expense for the Period was EUR 21.1 million, a 29% increase compared with EUR 16.4 million for the nine months ending 30 September 2014. This increase is mainly due to the USD 200 million bond issuance in August 2014, SEK 225 million bond issued in March 2015 and SEK 150 million additional issue in September 2015. The average balance of the Group's indebtedness in the Period increased to EUR 229.3 million from EUR 184.7 million, with an average interest rate of 12%, in line with last year.

Net impairment losses on loans and receivables

Net impairment losses for the Period were EUR 57.0 million, a 37% increase compared with EUR 41.7 million for the nine months ending 30 September 2014. The increase in net impairment losses primarily reflects the expansion of the Group's portfolio in both existing and new jurisdictions, as well as its application of prudent, conservative impairment policies. Net impairment losses represented 25% of interest income, the same as last year.

General administrative expenses

General administrative expenses reported for the Period were EUR 89.0 million, a 53% increase compared with EUR 58.1 million reported for the nine months ending 30 September 2014. As indicated in last quarter's report, the Group continues to invest across the business to support future growth. The increase in personnel costs was mainly attributable to hiring in product development, risk, legal and finance. Marketing campaigns were used to maintain leading positions in existing markets. The Group has also been investing in its IT platforms to ensure the appropriate infrastructure is in place to support the development of the business.

The table below sets out a breakdown of the Group's general administrative expenses.

	Nine months ending 30 September		
	2015	2014	
	(in millions	of EUR)	
Marketing and sponsorship	35.6	23.8	
Personnel costs	26.5	16.0

Rent and utilities	1.8	1.1	
Depreciation and amortization	0.9	0.7	
Other	7.1	4.9	
Total	89.0	58.1	

For the first nine months of 2015 and 2014, marketing and sponsorship costs accounted for 40% and 41% respectively, and personnel costs accounted for 30% and 28%, respectively, of general administrative expenses.

For the first nine months of 2015 and 2014, variable costs (*i.e.*, all marketing and sponsorship costs, personnel costs, application inspection costs, IT expenses, debt collection costs, communication expenses and bank services) accounted for 90% of total administrative costs in both periods. Such costs strongly correlate to movements in loan sales.

Other income/(expense)

Other expense for the Period amounted to EUR 2.9 million. For the nine months ending 30 September 2014, other expense was EUR 0.3 million. The increase is mainly due to the net effect of foreign currency hedging transactions.

Profit before tax

For the reasons stated above, the Group's profit before tax for the Period was EUR 59.3 million, a 24% increase compared with EUR 48.0 million for the nine months ending 30 September 2014. Corporate income tax

The Group's corporate income tax expense increased by 33% to EUR 13.3 million for the Period, compared with EUR 10.0 million for the nine months ending 30 September 2014.

The table below sets out a breakdown of the Group's corporate income tax for the Period and 2014.

Total	13.3	10.0

Profit from continuing operations

For the reasons stated above, the Group's profit from continuing operations for the Period was EUR 46.0 million, a 21% increase compared with EUR 38.0 million for the nine months ending 30 September 2014.

Profit from discontinued operations, net of tax

In connection with the discontinuation of operations in Estonia and decisions to sell the Russia, United Kingdom and North America business segments, the results of operations in these segments were reflected separately as discontinued operations in the consolidated statement of profit and loss and other comprehensive income for the Period. In the same period in 2014, the United Kingdom and North America business segments were reflected separately as discontinued operations.

For the Period, the Group recorded a profit from discontinued operations, net of tax, of EUR 5.3 million, compared with a profit of EUR 1.7 million for the nine months ending 30 September 2014.

Assets

The Group had total assets of EUR 423.7 million as of 30 September 2015, compared with EUR 370.0 million as of 31 December 2014, representing an increase of EUR 53.6 million, or 13%. This increase was mainly due to an increase of EUR 57.7 million in loans and advances due from customers and an increase of EUR 13.8 million in cash. Partially offsetting these were decreases in financial instruments at fair value and other assets. The movement of US operations outside of the 4finance Holding SA consolidation group in July affects comparison with the 30 June 2015 balance sheet. Some of the capitalized development costs reported as intangible assets last quarter were within US entities, so intangible assets are lower than as of 30 June 2015. Other assets are greater, partly due to inclusion of loans to those companies, formerly treated as intercompany loans.

As of 30 September 2015 and 31 December 2014, 82% and 74% respectively of the Group's assets were self-liquidating (*i.e.*, loans and advances from customers and cash as a percentage of total assets).

Loan Portfolio

As of 30 September 2015, the Group's net loan portfolio equaled EUR 299.1 million, compared with EUR 241.4 million as of 31 December 2014, representing an increase of EUR 57.7 million, or 24%. The Group's loan portfolio accounted for 71% of total assets as of 30 September 2015 and 65% of total assets as of 31 December 2014.

The Group's non-performing loan portfolio as of 30 September 2015 represented 36% of total gross loans outstanding as of that date. EUR 11.7 million, or 8%, of this was non-performing interest. The Group's total gross non-performing loan portfolio increased by EUR 36.9 million, or 34%, during the Period mainly due to increased loan issuance.

Liabilities

The Group had total liabilities of EUR 263.1 million as of 30 September 2015, compared with EUR 257.0 million as of 31 December 2014, representing an increase of EUR 6.0 million. Liabilities mainly consist of loans and borrowings, which decreased slightly overall as the '2015 Notes' and some other loans were repaid, partially offset by the issuance of the '2018 Notes' and the increase in EUR amount of the '2019 Notes' due to the change in EUR/USD exchange rate.

Net cash flows used in operating activities are calculated as profit before taxes, adjusted for non-cash and other items and the effect of changes to current assets and short-term liabilities, less corporate income tax paid. Net cash flows generated in operating activities in the Period increased to EUR 17.8 million from EUR 1.2 million in the same period last year. The changes mainly resulted from the increased profit in the Period, with limited net change from asset/liability movements. Compared to the second quarter, other assets have increased and financial instruments, used for currency hedging, have been listed separately.

The Group's cash flows which were used in investing activities mainly include the purchase and disposal of property, equipment and intangible assets, loans issued and loans repaid. Net cash used in investing activities was EUR 6.8 million in the Period. Related party scope now includes loans to US entities that were formerly eliminated on consolidation.

The Group's cash flows from financing activities mainly reflect proceeds that were received from borrowings, the repayment of principal and interest on indebtedness, and the payment of dividends. The issuance of '2018 Notes' in March and September accounted for most of the loans received and notes issued in the Period.
